Keywords

logi.CAD, logi.DOC, Version, 5.0, B3001, Vista, fixbuild

Symptom (public)

Problem (public)

Solution (public)

List of new functions:

* Windows Vista Support

As of version 5.0 build 3001 it is possible to run logi.DOC/logi.CAD under the operating system Windows Vista Business.

* New Dongle Type "CodeMeter"

Now you can run your logi.DOC/logi.CAD license also by using the new dongle type "CodeMeter".

* Creating Ladder Diagram by FBD-Editor

With the logi.DOC/logi.CAD FBD-editor you can create/modify POUs not only in Function Block Diagram (FBD) and in Sequential Function Chart (SFC) language - as already in previous versions - but also in the IEC programming language "Ladder Diagram" (LD).

For more information look up the "New Features in version 5.0" documentation, which is available in PDF format:

* [1]New Features logi.DOC Version 5.0 (483 KB)

* [2]New Features logi.CAD Version 5.0 (490 KB)
